

## IOSR Iournal of Mathematics

International Organization of Scientific Research

## **Contents:**

Mathematical Study of Natural Frequencies of Human Thoracic Aorta  24-29  On Non-invariant Hyper surfaces of a Nearly Kenmotsu Manifold  30-34  Study of Order Statistics of New Distribution  35-43	Completeness and Compactness of Function Spaces on Uniform Groups	01-03
Case Study of Niger State  Some Properties on State Residuated Lattices  12-18  The embodiment of analogy and transformation in complex analysis  19-23  Mathematical Study of Natural Frequencies of Human Thoracic Aorta  24-29  On Non-invariant Hyper surfaces of a Nearly Kenmotsu Manifold  30-34  Study of Order Statistics of New Distribution  35-43  Modeling and Stability Analysis of the African Swine Fever Epidemic Model  44-65  A Review on Improving Laplace Transform Accessibility for Basic Mathematics  66-68	Prime Labeling of Split Graph of Star K1,n	04-07
The embodiment of analogy and transformation in complex analysis  19-23  Mathematical Study of Natural Frequencies of Human Thoracic Aorta  24-29  On Non-invariant Hyper surfaces of a Nearly Kenmotsu Manifold  30-34  Study of Order Statistics of New Distribution  35-43  Modeling and Stability Analysis of the African Swine Fever Epidemic Model  44-65  A Review on Improving Laplace Transform Accessibility for Basic Mathematics  66-68		08-11
Mathematical Study of Natural Frequencies of Human Thoracic Aorta  24-29  On Non-invariant Hyper surfaces of a Nearly Kenmotsu Manifold  30-34  Study of Order Statistics of New Distribution  35-43  Modeling and Stability Analysis of the African Swine Fever Epidemic Model  44-65  A Review on Improving Laplace Transform Accessibility for Basic Mathematics  66-68	Some Properties on State Residuated Lattices	12-18
On Non-invariant Hyper surfaces of a Nearly Kenmotsu Manifold  30-34  Study of Order Statistics of New Distribution  35-43  Modeling and Stability Analysis of the African Swine Fever Epidemic Model  44-65  A Review on Improving Laplace Transform Accessibility for Basic Mathematics 66-68	The embodiment of analogy and transformation in complex analysis	19-23
Study of Order Statistics of New Distribution 35-43  Modeling and Stability Analysis of the African Swine Fever Epidemic Model 44-65  A Review on Improving Laplace Transform Accessibility for Basic Mathematics 66-68	Mathematical Study of Natural Frequencies of Human Thoracic Aorta	24-29
Modeling and Stability Analysis of the African Swine Fever Epidemic Model  44-65  A Review on Improving Laplace Transform Accessibility for Basic Mathematics 66-68	On Non-invariant Hyper surfaces of a Nearly Kenmotsu Manifold	30-34
A Review on Improving Laplace Transform Accessibility for Basic Mathematics 66-68	Study of Order Statistics of New Distribution	35-43
	Modeling and Stability Analysis of the African Swine Fever Epidemic Model	44-65
		66-68
